

## Community Supported Fishery

### what is a csf?

A community supported fishery (CSF) is based on the community supported agriculture (CSA) model and helps connect residents directly to local fisheries. CSF members purchase advance shares of fish to provide a guaranteed market for local fisheries, help build meaningful connections between local farmers and residents, support small farm businesses, and limit the distance food travels.

### fishery profile

Providing fish for the Cville Community Supported Fishery will be the Virginia Natural Fish Company (VNFC), a cooperative of small aquaculture farm families in south-central Virginia. VNFC farms raise fish sustainably and do not use hormones or antibiotics. Fish are raised in freshwater ponds free of pollution from pesticide and herbicide runoff. All products are safe and are fed the highest quality feed on the market to ensure high nutritional value.

### delivery

Fish will be delivered biweekly to the Charlottesville City Market by a VNFC farmer. The shrimp is flash frozen, and trout and catfish are vacuum sealed and frozen for optimal freshness. All products are professionally packaged.

Members can pick up their shares between 8:00 - 12:00 on the following Saturday mornings : April 2, 16, 30 ; May 14, 28 ; June 11

### share descriptions
